

How can Bricsnet offer implementation within weeks while similar systems take many months – often years – to get up and running?

Rapid Implementation. It's Time for Results.

You know that technology can help you reach your goals. You want a system in place so that you can begin seeing results quickly. Your system needs to serve your immediate objectives, but also give you room to grow.

It's time to turn to Bricsnet.

At Bricsnet, we understand that you don't want to focus on implementing technology. You're looking for the end result: The advantages that technology can bring to your organization. And you want those advantages now.

Bricsnet's Rapid Implementation program is designed to get you up and running quickly – within weeks of signing a contract – so that important real estate projects can start on time and proceed without confusion or delay to successful completion.

Going live in weeks, Bricsnet customers open locations faster, orchestrate remodels with minimal disruptions, manage changes, update financial information in real time, secure project documents for online collaboration and gain a competitive edge with accurate, easily available information rendered through web portals.

How can Bricsnet offer implementation within weeks while similar systems take many months – often years – to get up and running?

- ▷ **Proven implementation methodology that zeroes in on your needs.** Bricsnet's Professional Services team will work with you to quickly identify your objectives, map data and processes, and establish a timeline for success.
- ▷ **A phased approach that lets you add to the system when you are ready.** Bricsnet's Rapid Implementation program starts with your real estate portfolio and project management goals, allowing you to carefully plan and time future expansions to deal management, lease administration, asset management, maintenance and space – whenever you and your organization feel the time is right.
- ▷ **Hosted services that eliminate the IT burden from your organization.** Bricsnet's state-of-the-art data center operates with greater than 99.9% uptime, meaning your system is ready to use wherever and whenever you need it. And to provide the security you need, both Bricsnet Operations and the Bricsnet Data Center regularly undergo the rigorous audits needed to achieve full compliance with the SAS70 Type II standard. Ask to see our audit report for the assurances you need.

▷ **Robust, flexible functionality that allows you to follow your trusted business practices – or improve them.** Bricnet believes our standard, robust functionality will meet the great majority of your needs – more than 80 percent in most cases. But we also understand that every organization has specific requirements, so we've included configurable workflow and business rules to allow you to easily reconfigure processes to match your business needs.

▷ **A configurable interface that allows you to adjust screens within minutes to track the data you need – in ways your users understand.** To get to work rapidly, your team needs application screens that include all the information they need, presented in ways that are comfortable and easy to use. Bricnet provides web-based tools that anyone can use—without any specialized knowledge – to adapt screens in seconds to optimize them for your organization.

▷ **Intuitive, easy-to-learn tools that reduce training time.** Bricnet leverages a wide variety of graphical tools, including mapping interfaces, floor plans, graphs, charts and more to present information in the most user-friendly fashion. In addition, Bricnet lets you set up templates that speed up creation of new projects and ensure that your accepted practices are followed to the letter.

About Bricnet Bricnet delivers powerful Strategic Planning and Management solutions that drive value. From project team collaboration to executive decision support, Bricnet offers software applications and strategic advisory services that provide unprecedented ease of use, coupled with enterprise-level power and flexibility. For more than 20 years, Bricnet has focused on improving the ability of businesses to effectively manage their properties, buildings and land. Bricnet's deep knowledge and experience has evolved into a comprehensive set of solutions centered on Strategic Planning and Operational Performance throughout the entire real estate lifecycle.

▷ **A Services Oriented Architecture designed specifically to simplify integration to your other critical business systems.** Bricnet understands that your organization relies on many systems to provide the information and oversight required to conduct business. We've designed our technology to easily integrate with your other systems – financial, human resources, inventory, point of sales or any other – so that you can get all the information you need in one, convenient, well organized place. Many of our clients rely on Bricnet for consolidated presentation of information from across the enterprise.

With Bricnet's Rapid Implementation program, you will realize the benefits of web-based real estate Portfolio and Project Management in just weeks. Our Rapid Implementation program includes import of your portfolio data from legacy sources, as well as an interface to your payments system and training for your end users, all for one, all-inclusive price. Additional options are available, of course, to ensure that all of your requirements are met.

In addition, Bricnet and its partners offer a wide range of targeted consulting services that give you the opportunity to enlist expert support to address business issues – anything from expense management to audits to business process re-engineering and more – that can help you to gain the best advantage from your technology investment.
